## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 13 February 2007 has been entered.

### *Election/Restrictions*

2. Claims 1, 2, 4, 5, 6, 7 are allowable. Claims 8-16, previously withdrawn from consideration as a result of a restriction requirement, requires all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement between inventions Species I, II, III & IV, as set forth in the Office action mailed on 28 April 2006, is hereby withdrawn** and claims 8-16 are hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

***Formal Matters***

3. This application is in condition for allowance except for the following formal matters:

Claim 8 recites the limitation "said buffer circuit" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 11 recites the limitation "said buffer circuit" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 14 recites the limitation "said buffer circuit" in 1. There is insufficient antecedent basis for this limitation in the claim.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

***Allowable Subject Matter***

4. Claims 1, 2, 4-16 are allowed.

5. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

6. The following is a statement of reasons for the indication of allowable subject matter:

The primary reason for indicating allowable subject matter of claims 1, 2, 4-16 is the inclusion of the limitations of a printhead controller including a circuit, address signal and selection signal, wherein circuit includes: *plurality of inverters connect in series, including at least a first inverter and a second inverter, first inverter receiving selection signal, each of plurality of inverters*

Art Unit: 2853

*receiving the same address signal, second inverter outputting a switching signal corresponding to selection signal and address signal; ink jetting circuit determining whether or not to jet out ink based on said switching signal; switching signal is a logic high voltage level and selectively enables ink jetting circuit when address signal and selection signal are at the logic high voltage level.* It is these limitations found in each of the claims, as they are claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.
